## **JEFFREY S. MARZUKI**

**Principal**

### **EDUCATION**

**University of Illinois at Urbana-Champaign**  
Bachelor of Architecture | 1983

### **EXPERIENCE**

Since joining KGH in 2001, Mr. Marzuki has developed his expertise in the investigation and analysis of exterior building systems. He has investigated many different types of buildings, including masonry structures, concrete structures, and curtain wall systems. The restoration projects that he has completed include both vintage and modern high-rise buildings. Many of these buildings have varied exterior building elements that include limestone, terra cotta, and brick masonry.

Mr. Marzuki also has extensive experience with the investigation and repair of high-rise concrete facade structures, as well as concrete slab structures which include parking garages and outdoor plazas. Roof replacement projects are another type of building repair project that Mr. Marzuki has investigated and completed. In addition, he has developed window replacement programs for high-rise residential buildings.

In conjunction with all of his various investigative projects, Mr. Marzuki has developed contract documents for each of the various building repair projects. During the implementation of various repair programs, Mr. Marzuki has provided field observation and contract administration services to evaluate the progress of the work.
