MICHAEL J. BONICK

Principal, Vice President

EDUCATION

University of Michigan

Master of Architecture | 2003

University of Illinois at Urbana-Champaign

Bachelor of Science in Architectural Studies | 2000

EXPERIENCE

Mr. Bonick first joined KGH in 1998 and has since been involved with the investigation and repair of a variety of building types including low- and high-rise residential, commercial, institutional, and religious structures. Mr. Bonick is expert in the analysis of performance problems and the design of repairs relative to distressed and deteriorated building envelopes and structures. Mr. Bonick is intimately involved with each phase of the investigative and repair process, and has implemented restoration projects for virtually all facade types, including brick, terra cotta, limestone, curtain walls, concrete facades, historic landmarks, etc., as well the structural repair of parking garages, and the repair and replacement of roof assemblies and waterproofing membranes. Mr. Bonick also recently developed and implemented an innovative system for the analysis and restoration of moisture-saturated clay brick masonry for multi-story load-bearing wall systems.

Mr. Bonick's work as a Principal | Project Manager includes close interaction with building owners, property managers and supervisors, condominium boards, as well as local authorities and building departments and building restoration contractors. Michael prides himself on personal, timely and attentive service, and it is his goal to help Owners invest in their buildings in the most efficient way possible while working to restore and maintain the building's integrity.
